

# Sapa Door 2086 with E-frame

E-frame, profile with integrated electronic circuits

Combination possibilities

Access control system with entry phone, camera, lock and connectors are examples of common components of modern entrance doors.

Our E-frame profile for the 2086 system facilitates wiring as well as the installation and service of the electronic components. The service cover is screwed on through a hidden fixture, which ensures clean appearance and prevents damage.

*Sapa 2086 doors with E-frame offer otherwise the same choice of profiles and design solutions as Sapa 2086 doors.*

Inside, with service cover open
